DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 4 recites the limitation "the hand grip end of the rod" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lisowski (US 5,937,473). Lisowski discloses a boat implement that comprises an elongate cylindrical rod. The rod is curved (figure 13) and has a ridged hand grip (59) at one end and a tines (83) at the opposite end. The hand grip end has an aperture in which strap (60) is held. The implement is designed to float in the event that it is dropped in the water.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lisowski (US 5,937,473) in view of Nunziato et al. (US 3,993,013). The Lisowski rod has tines that are connected by a brace bar (reinforcing ribbing (80)). Lisowski does not disclose that the hand grip ridges are cross hatched. Nunziato discloses a boat implement with a hand grip (26) having cross-hatched ridges. The cross hatch ridges enhance the user's grip. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to further modify the invention of Lisowski by using a hand grip with cross hatch ridges. The motivation would be to enhance the user's grip.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Urie, Jr. et al. discloses a boat cleaning implement that has a curved elongate rod. Sabella discloses a boat cleaning implement that has a two-piece angled rod with tines at one end. Cogswell discloses a boat cleaning implement. Wesson discloses a boat implement that has exchangeable end attachments, including a tined attachment. Roach et al. discloses a boat hook that floats. Duckett discloses a boat hook with a hand grip with ridges. Lathan and Smith et al. each disclose an

implement that has an elongate cylindrical rod that is slightly curved, one end of the rod having a tined section.
